GRAND VIEW RESEARCH

Grand View Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. To help clients make informed business decisions, we offer market intelligence studies ensuring relevant and fact-based research across a range of industries including healthcare, technology, chemicals, materials, and energy.

Headquartered in **San Francisco** with a full-service research and analysis team based in **Pune, India**

Top-shelf research and reporting through responsive, **one-on-one partnerships**

More than **150 analysts** with expertise in key fields

Coverage on more than **30 industries** and sub-sectors around the globe

More than **1,000** syndicated and customized reports each year

Hundreds of hours of **consultation** on markets around the globe

With a deep-seated understanding of many business environments, Grand View Research provides strategic objective insights. We periodically update our market research studies to ensure our clients get the most recent, relevant, and valuable information. Grand View Research has a strong base of analysts and consultants from assorted areas of expertise.

Our industry experience and ability to zero-in on the crux of any challenge gives you and your organization the ability to secure a competitive advantage.

We believe that a one-size-fits-all model fails to help businesses achieve their goals. Clients choose the engagement model that best fits their research needs and work style.

How is the impact of COVID-19 Covered in the Report

Response Based Factors Covered in the Report

Outcome Based Factors Covered in the Report

Market Voice : Key Opinions

Analyst Perspective

The growth is attributed to the rising inclination toward modern clothing in the gym and for everyday activities. Consumers are increasingly incorporating sports and fitness activities into their everyday routines owing to their increased health consciousness. As a result of the increasing participation, market dynamics have changed recently, resulting in increased demand for activewear clothing and sports gear.

Leading Manufacturer

The global demand for activewear is also being driven by increased awareness of health and fitness, along with a shift toward more active lifestyles. This trend is particularly noticeable among women, who are seeking to counter the effects of sedentary lifestyles by engaging in leisure activities such as running and cycling.

Regional Insights

The growing interest in active lifestyles has led more women to spend time in gyms and yoga centers, boosting the demand for activewear. Additionally, rapid urbanization and rising disposable incomes in developed countries are further encouraging women to purchase sportswear.

Note: Above listed verbatim responses are intended to provide an overview of the market pulse. Please get in touch with us to learn more about our primary research methodology & how we could customize our services to meet your end objective.

Top 3 Trends : Key Takeaways

- 1 { For millennials and Gen Z, activewear represents a lifestyle choice that aligns with their values of health, wellness, and convenience. These younger generations prioritize physical fitness and often engage in various activities that require flexible and durable clothing. Moreover, the rise of athleisure, where activewear is stylish enough to be worn outside of the gym, has made it socially acceptable to wear these garments in a variety of settings.
- 2 { The emphasis on mental and physical well-being, along with the demand for multi-purpose fashion that supports an active, on-the-go lifestyle, has fueled the popularity of activewear among these age groups. Additionally, the influence of social media and celebrity endorsements has further popularized activewear, making it a staple in the wardrobes of many young people.
- 3 { In the U.S., millennial and Gen Z females allocate more spending to women's athleisure than to men's and children's athleisure combined, highlighting a strong affinity for athleisure among younger generations. Millennials, in particular, are willing to invest significantly in fitness, with lifetime spending projected to be around USD 112,000, a substantial portion of which goes toward activewear.

Content Structure & Design

Executive Summary

Innovations in fabric technology, such as moisture-wicking materials and compression garments, enhance performance and comfort, driving consumer preference toward activewear.

The demand for activewear among men is estimated to grow at a CAGR of 8.7% from 2025 to 2030.

The sales of activewear through online channels are estimated to grow at a CAGR of 9.7% from 2024 to 2030.

The activewear market was valued at USD 406.83 billion in 2024 and is expected to grow at a CAGR of 9.0% from 2024 to 2030. Increasing awareness and emphasis on physical fitness and wellness lifestyles encourage individuals to invest in activewear for regular exercise and leisure activities. Activewear has transcended its functional role to become a fashion statement, driven by trends favoring athleisure wear that blends comfort with style.

Women's activewear held a market share of 48.00% in 2024. The rising focus on fitness and wellness among women, supported by a surge in gym memberships and participation in fitness classes, is fueling the demand for activewear. Women's activewear brands are increasingly incorporating fashion-forward designs, making them versatile for both workouts and casual wear, which appeals to fashion-conscious consumers.

The **in-store** sales of activewear accounted for the market share of 71.00% in 2024. Physical stores provide consumers with the opportunity to try on activewear, ensuring proper fit and comfort, which is crucial for performance-based apparel. Physical stores often engage with the local community through events, workshops, and fitness classes, fostering a sense of community and brand loyalty that translates into sales growth. In addition, in-store customer service offers personalized assistance and expert advice, enhancing the shopping experience and helping consumers make informed choices.

The Asia Pacific activewear market is estimated to grow at a CAGR of 10.9% from 2025 to 2030.

North America held a market share of 38.85% of the global revenues in 2023. There is a significant increase in health and fitness awareness among consumers in North America, particularly in the U.S., leading to a higher participation rate in physical activities and a corresponding demand for activewear. Furthermore, the presence of fitness influencers and celebrities who endorse activewear brands on social media platforms significantly impacts consumer preferences and purchasing behavior in the U.S

Companies are expanding their reach into emerging markets to capitalize on the growing demand for activewear. Tailoring products to meet local preferences and leveraging regional marketing strategies are key for market penetration.

The activewear market is characterized by intense competition, driven by both established brands and emerging players striving for market share. Some of the key players operating in this market are Adidas AG, PUMA SE, Nike Inc., Columbia Sportswear Company, PVH Corp., VF Corporation, Skechers USA, Inc., ASICS Corporation, and Under Armour, Inc. Numerous new entrants and niche brands are disrupting the market by offering unique value propositions, such as specialized performance gear, sustainable materials, and direct-to-consumer sales models.

Market Variables, Trends & Scope

3.1 Market Introduction

The global activewear market size was valued at USD 377.57 billion in 2023 and is expected to expand at a compound annual growth (CAGR) of 8.9% from 2024 to 2030. The growth of the market is attributed to the rising inclination towards modern clothing in the gym and for everyday activities.

Consumers are increasingly incorporating sports and fitness activities into their everyday routines owing to their increased health consciousness. As a result of the increasing participation, market dynamics have changed recently, resulting in increased demand for activewear clothing and sports gear.

The global demand for activewear is also being driven by increased awareness of health and fitness, along with a shift towards more active lifestyles. This trend is particularly noticeable among women, who are seeking to counter the effects of sedentary lifestyles by engaging in leisure activities such as running and cycling. The growing interest in active lifestyles has led more women to spend time in gyms and yoga centers, boosting the demand for activewear. Additionally, rapid urbanization and rising disposable incomes in developed countries are further encouraging women to purchase sportswear.

For millennials and Gen Z, activewear represents a lifestyle choice that aligns with their values of health, wellness, and convenience. These younger generations prioritize physical fitness and often engage in various activities that require flexible and durable clothing. Moreover, the rise of athleisure, where activewear is stylish enough to be worn outside of the gym, has made it socially acceptable to wear these garments in a variety of settings. The emphasis on mental and physical well-being, along with the demand for multi-purpose fashion that supports an active, on-the-go lifestyle, has fueled the popularity of activewear among these age groups. Additionally, the influence of social media and celebrity endorsements has further popularized activewear, making it a staple in the wardrobes of many young people.

In the U.S., millennial and Gen Z females allocate more spending to women's athleisure than to men's and children's athleisure combined, highlighting a strong affinity for athleisure among younger generations. Millennials, in particular, are willing to invest significantly in fitness, with lifetime spending projected to be around USD 112,000, a substantial portion of which goes toward activewear.

Fig.1 Global activewear market size, 2018 to 2030 (USD Million)

Source: D&B Hoovers, Pitchbook, Company Blogs & Reports, Primary Interviews, Grand View Research

Moreover, as customers become more environmentally conscious, they expect transparency and ethical sourcing from brands. This shift in consumer preference emphasizes the importance of using recycled materials, reducing waste, and improving supply chain efficiency. Such practices not only support corporate social responsibility objectives but also appeal to ecologically concerned customers, build brand loyalty, and differentiate companies in a crowded market. Adopting sustainability has evolved beyond a mere trend; it is now a strategic necessity for future-proofing businesses and mitigating risks associated with changing customer preferences and environmental concerns.

These insights will be made available upon full report purchase. Upgrade report license to gain access to the complete analysis.

3.3 Value Chain Analysis

The global activewear market value chain includes raw material suppliers, manufacturers, distribution channels, and end users. Each shareholder has its unique contribution and operation strategy in the market as mentioned in the chart below. In this industry, all the elements in the value chain are very important for businesses to carry out operations and generate revenues.

Fig.3 Activewear market: Value chain analysis

Source: D&B Hoovers, Pitchbook, Company Blogs & Reports, Primary Interviews, Grand View Research

3.3.1 RAW MATERIAL ANALYSIS

There is a notable shift in activewear manufacturing towards natural and organic ingredients. This trend reflects consumer preferences for products perceived as healthier and more sustainable. As a result, manufacturers are increasingly prioritizing materials like plant-based fibers and extracts to meet these evolving demands.

The activewear market is influenced by several raw material trends, driven primarily by consumer preferences and sustainability concerns. Here are some of the notable trends:

Synthetic Fibers: Synthetic fabrics like polyester, nylon, and spandex are integral to modern activewear for their distinct properties. Polyester is valued for its moisture-wicking abilities and durability, making it ideal for keeping athletes dry during intense workouts. Nylon contributes strength, flexibility, and resistance to abrasion, ensuring longevity in activewear designed for rigorous activities. Spandex, or elastane, adds essential stretch and recovery, which are crucial for form-fitting and flexible garments that support dynamic movement.

Natural Fibers: Natural fibers also play a significant role in activewear. While cotton offers breathability and comfort, it retains moisture more than its synthetic counterparts, limiting its use in high-performance gear. Bamboo fibers are gaining popularity for their softness, moisture-wicking capability, and sustainable sourcing, appealing to eco-conscious consumers. Merino wool stands out for its natural moisture-wicking, odor resistance, and temperature-regulation properties, making it suitable for activewear designed for varying climates.

Upgrade report license to gain access to the complete analysis.

3.3.2 SALES/ RETAIL CHANNEL ANALYSIS

Manufacturers in the activewear market have increasingly embraced advanced technologies to improve efficiency, precision, and flexibility in the production process. Automation, robotics, and computerized systems have been integrated into various stages of manufacturing, including fabric cutting, stitching, and quality control. These technologies allow for faster production, reduced error rates, and enhanced customization capabilities.

As sustainability becomes a prominent concern in the fashion industry, activewear manufacturers are incorporating eco-friendly practices into their production processes. This includes using recycled or organic materials, reducing water and energy consumption, implementing waste management systems, and adopting closed-loop manufacturing approaches. Manufacturers are also exploring innovative techniques like bio-based materials and natural dyeing methods to minimize the environmental impact of activewear production.

3.4.1 MARKET DRIVER IMPACT ANALYSIS

Table 1 Activewear market: Driver factor impact analysis

MARKET DRIVERS	TIMELINE IMPACT ANALYSIS	
	2023 - 2026	2027 - 2030
Rising adoption of smart and high-tech fabric		
Increasing participation in sports and fitness activities		

LOW

MEDIUM

HIGH

Source: D&B Hoovers, Pitchbook, Company Blogs & Reports, Primary Interviews, Grand View Research

3.4.1.1 RISING ADOPTION OF SMART AND HIGH-TECH FABRIC

The rising integration of smart and high-tech fabrics within the activewear sector is driving significant demand and growth in the market. This trend is primarily fueled by advancements in fabric technology aimed at enhancing performance and functionality. These fabrics incorporate cutting-edge features such as moisture-wicking properties, temperature regulation, and biometric monitoring capabilities. By addressing the practical needs of athletes and fitness enthusiasts, these innovations not only improve comfort during physical activities but also set brands apart in a competitive landscape increasingly focused on innovation and differentiation.

Furthermore, the convergence of fashion trends with technological advancements is pivotal in driving consumer interest. Activewear that seamlessly blends stylish designs with advanced functionalities appeals strongly to younger demographics and fashion-conscious consumers.

Listed below are some of the new product launches over the past few months:

- In January 2024, Celanese Corporation, a global specialist in materials and chemicals, partnered with Under Armour, Inc., a leading innovator in athletic apparel and footwear, to introduce NEOLAST, a new fiber designed for high-performance stretch fabrics. NEOLAST aims to provide the apparel industry with a sustainable alternative to elastane, commonly known as spandex, which enhances fabric elasticity. This innovation could potentially address the challenge of recycling performance stretch fabrics, a longstanding issue in achieving circular manufacturing practices in the industry.

3.4.2 MARKET RESTRAINT IMPACT ANALYSIS

Table 2 Activewear market: Restraint factor impact analysis

MARKET RESTRAINT	TIMELINE IMPACT ANALYSIS	
	2023 - 2026	2027 - 2030
Presence of counterfeit products		

3.4.2.1 PRESENCE OF COUNTERFEIT PRODUCTS

The rising prevalence of counterfeit products in the fashion industry is expected to impede the growth of the activewear market. Counterfeit/fake/first-copy apparel are products that are falsely sold and marketed at a relatively lower price than their original/branded counterparts. The most common brand victims of fake sportswear are Nike, Under Armour, Puma, and Adidas. The circulation of counterfeit apparel is more pronounced in Asian markets, particularly in China, Indonesia, and India, through the gray market that encompasses unauthorized suppliers and distributors selling branded products. These products are illegally distributed outside the official distribution channel without the original company's permission. According to the U.S. Government Accountability Office, more than 65% of the counterfeit products in the U.S. originate from China or Hong Kong. This easy availability of counterfeit products is likely to limit the growth of the athleisure market during the forecast period.

Consumer Behavior Analysis

4.1 Consumer Trends and Preferences

As various sports have evolved and become increasingly specialized, there has emerged a heightened demand for tailored activewear solutions. Athletes seek apparel meticulously crafted to meet the unique requirements of their chosen sports, emphasizing factors like range of motion, support, and protective features.

Initially, athletes commonly utilized generic clothing that did not cater optimally to their specific activities. However, as competitive pressures intensified and athletes aimed to maximize performance, the inadequacies of generic apparel became apparent. This recognition spurred a significant trend toward specialized activewear, designed to enhance athletic capabilities and meet the rigorous demands of modern sports.

There is a growing consumer trend toward quick-dry apparel, praised for its ability to efficiently absorb sweat and rapidly dry, enabling users to transition from sweaty to dry swiftly. This lightweight material is particularly favored during hot, humid summer conditions, as it washes well and dries quickly, making it convenient for frequent use and travel. Consumers also appreciate the garment's ability to dry rapidly after washing, emphasizing its practicality and ease of maintenance.

In February 2023, MP Activewear introduced the Tempo Ultra Collection, targeting individuals seeking affordable, high-performance activewear with minimal environmental impact. It features advanced Polygiene technology, which enhances the durability and freshness of MP Activewear's premium apparel by combating odors, limiting bacterial growth, and reducing the frequency of washes. The collection is tailored for both HIIT athletes and regular gym goers.

The trend of athleisure, characterized by the widespread adoption of activewear for everyday wear, has propelled the activewear market. Influenced by celebrities, social media trends, and urban fashion, activewear has seamlessly integrated into mainstream apparel. Emphasizing sleek aesthetics, vibrant colors, and bold patterns, activewear now allows individuals to express their style while embracing an active lifestyle.

4.2 Factors Affecting Buying Decision

The major factors influencing the buying decisions of the consumers include the quality, price, and material/fabric of the product. Consumers with high affordability and purchasing power prefer to buy high-quality products, irrespective of their prices. On the other hand, consumers with relatively low purchasing power prefer purchasing lower-priced products that can offer significant quality.

Fig.7 Factors influencing buying behavior in the activewear market

Source: D&B Hoovers, Pitchbook, Company Blogs & Reports, Primary Interviews, Grand View Research

Note: This section will contain a graphical representation of the key parameters influencing buying behavior, along with their respective ratings, determined based on consumer insights as gathered during the research.

6.4 In-store

6.4.1 ACTIVEWEAR MARKET ESTIMATES AND FORECAST THROUGH IN-STORE, 2018 – 2030 (USD MILLION)

Source: D&B Hoovers, Pitchbook, Company Blogs & Reports, Primary Interviews, Grand View Research

A major factor driving in-store sales channels is the increasing consumer preference for purchasing high-end activewear from retail stores. This purchasing mode offers consumers a rich shopping experience and makes it easier for them to understand the exact size and quality of the apparel. In addition, retail stores and company-operated stores are associated with genuine products, and companies can curb the infiltration of counterfeit products through these sales channels. The availability of various brands under one roof, which helps in the easy comparison of products in terms of price and specifications, is a key factor driving the growth of retail stores in the activewear market.

Consumers prioritize product life cycle and price/value when purchasing activewear and find retail shops that are most convenient for trying and checking products before buying. The knowledgeable staff at these stores attracts first-time buyers with expertise in product specialties.

Note: Similar analyses will be provided for the different distribution channel categories, including online, covering insights into current & future market sizes, growth prospects, drivers for growth, consumer trends, and competition.

Activewear Market: Regional Analysis and Estimates

7.1 Activewear Market: Regional Outlook

7.2 North America

7.2.1 NORTH AMERICA ACTIVEWEAR MARKET ESTIMATES AND FORECAST, 2018 – 2030 (USD MILLION)

Fig.15 North America activewear market estimates and forecast, 2018 – 2030 (USD Million)

Source: D&B Hoovers, Company Blogs & Reports, Primary Interviews, Grand View Research

The activewear market in North America, particularly in the U.S., is experiencing significant growth driven by a surge in health and wellness awareness. This growth accelerated during the pandemic as consumers prioritized exercise and comfort, leading to increased spending on activewear for both home and office settings. Major brands like Nike, Adidas, and Under Armour dominate the market, with clothing and footwear being the primary segments.

Women are the predominant consumers, although the men's segment is growing rapidly. Brands such as Lululemon have successfully expanded their offerings to attract more male customers, reflecting a broader trend toward inclusivity in the activewear market. The increasing popularity of women's sports and the stylish nature of activewear that transcends gym use have sustained interest among female consumers, driving continued market expansion.

- **As of May 2024, Lululemon, a Canada-based activewear company's website audience is 35.24% male and 64.76% female.**
- **The largest age group of visitors are 25 – 34 year-olds.**

The rising popularity of women's sports is driving substantial growth in the industry across North America. For example, the 2022 women's NCAA basketball finals attracted 4.85 million viewers on ESPN, marking an 18% increase from the previous year. This trend highlights the expanding audience and growing interest in women's sports.

7.2.4.2 U.S. ACTIVEWEAR MARKET ESTIMATES AND FORECAST, 2018 – 2030 (USD MILLION)

Fig.16 U.S. activewear market estimates and forecast, 2018 – 2030 (USD Million)

Source: D&B Hoovers, Company Blogs & Reports, Primary Interviews, Grand View Research

The rising participation in physical activity in the U.S. has significantly boosted activewear demand. According to the 2024 Sports, Fitness, and Leisure Activities Topline Participation Report, nearly 80% of Americans aged six and older engaged in sports or fitness activities in 2023, a 2.2% increase from 2022. This upward trend, continuing for a decade, saw an additional 5 million participants in 2023.

Many consumers prefer athletic apparel made with natural fibers like cotton due to its comfort and softness. As a result, numerous brands, from luxury to fast fashion, are incorporating cotton into their activewear lines. For instance, in 2023, Able Made used cotton fabric provided by Burberry for its Made2.01 collection. Meanwhile, fast fashion retailer Forever 21 offers various cotton-rich activewear pieces, including biker shorts, crop tops, and a full-body jumpsuit with moisture-wicking fabric. Additionally, the Cotton Shop on the Fabric of Our Lives website features a curated selection of cotton activewear for men, women, and kids, available for purchase through designer or retail sites.

Activewear Market: Competitive Landscape

8.1 Recent Developments & Impact Analysis, By Key Market Participants

Table 12 Recent developments & impact analysis, by key market participants

Company	Recent Development	Impact on Operations
PUMA SE	In June 2024, PUMA announced a global partnership with HYROX, solidifying its position as the official apparel and footwear partner for HYROX races spanning from 2024 to 2027. It plans to create a new line of HYROX clothing using its advanced Cloudspun technology featuring dryCELL moisture-wicking capabilities. In addition, PUMA will introduce customized versions of its existing footwear models, such as the Velocity NITRO 3, the Deviate NITRO Elite 3, and the Deviate NITRO 3, in special HYROX color schemes to optimize athlete performance at HYROX competitions.	LOWMEDIUMHIGH
PVH Corp.	In June 2024, Tommy Hilfiger, a brand under the PVH Corp. umbrella, entered into a multi-year partnership with the United States SailGP Team. This partnership aims to merge fashion and sport, redefining fashion's role in sailing and sailing's role in pop culture. The collaboration will focus on pushing boundaries in performance, design, and culture within the world of sailing	LOWMEDIUMHIGH

Methodology and Scope

Fig.5 Methodology

Activewear market report estimations are derived based on hybrid model leveraging top down and bottom up approach tracking major market players' revenue and integrating information with qualitative parameters that influence buying behavior of the consumers.

Research Workflow

Fig.6 Various stages of research workflow

Information Procurement

Fig.7 Information procurement

Information procurement is one of the most extensive stages in our research process. As illustrated in the figure above, the techniques can broadly be categorized into five sections, as stated below:

PURCHASED DATABASE

- Includes company databases such as Factiva: This helps us compile metadata on historical sales volumes, prices, company revenues, and other industry statistics. Also, it serves as an important step in market sizing, especially, in case of commodity-flow techniques
- Other sources include SME journals, pertinent databases from third-party vendors to gain insights into:
- Usage rates
- Potential market-related statistics
- Information on unmet needs
- Regional expenditure pattern
- Investment information or opportunity-based statistics

GVR'S INTERNAL DATABASE

- Includes our internal database of data points, collected as a result of previous research & studies and information made available via our database management team
- Also includes internal audit reports & archives

SECONDARY SOURCES

- A list of secondary sources along with the information extracted from them will be available in the final deliverable.
- Sources consulted during preliminary phase include D&B Hoovers, PitchBook and Company Websites
- Notable examples include white papers, government statistics published by organizations like UN Comtrade, World Bank, KoL publications, company filings, investor documents etc.
- Secondary databases are aimed at gathering market intel, historical statistics, end user classifications according to SIC, NAICS, HS codes, and to understand trends available through public domains.

THIRD PARTY PERSPECTIVE

- This section includes market derivation through investor analyst reports, broker reports, academic commentary, government quotes & wealth management publications.

PRIMARY RESEARCH

Fig.8 Primary research pattern

Information Analysis & Data Analysis Models

Information procured from secondary and primary initiatives are then, analyzed by using the following tools/models: (a partial list)

- Identifying variables and establishing market impact
- Establishing market trends
- Analyzing future opportunities and market penetration rates by understanding end user commercialization, regional expansion etc.
- Analyzing changes in the industry dynamics to establish future growth
- Analyzing sustainability strategies adhered by market participants in an attempt to determine future course of the market
- Analyzing historical market trends and super-imposing them on the current and future variables to determine year-on-year trend
- Keeping a track of technological advancements in individual segments
- Base numbers are established by analyzing the following:
 - Company revenues and market share (this list generally includes the analysis of revenue published by publicly listed manufacturers)
 - Derivation of market estimates via analyzing parent and ancillary markets
- Model selection: demand-based bottom-up approach and mixed approach (top down and bottom up)

MARKET FORMULATION & VALIDATION

Report FAQs

How do I trust your report quality/data accuracy?

- ▶ We offer risk-free purchases. We will let you explore our report online through the conference without purchase commitment.
- ▶ Our portfolio of over 10,000 reports goes through rigorous quality checks and is based on robust models
- ▶ For client testimonials, case studies or additional questions, please reach out to us

My research requirement is very specific; can I customize this report?

- ▶ Yes, we offer free customizations within the research's scope
- ▶ 75% of our engagements are based on customized market reports
- ▶ Clients have free access to pre-sale analyst briefs to discuss requirements and recommendations

I have a pre-defined budget. Can I buy chapters/sections of this report?

- ▶ Yes, we sell sections of our reports
- ▶ You also have the option to buy excel & PPT versions of our reports.
- ▶ You may buy customized market intelligence based on your budget. We have a end user to offer irrespective of the price point

How do you arrive at these market numbers?

- ▶ Our research methodology is a three-step cyclic process:
 - It starts with Information Procurement from internal DBs, paid primary and secondary sources
 - The second step is Data Analysis and Modeling
 - The third step is by Data Validation via industry expert opinions
- ▶ For a detailed research methodology, please request for a sample report.

Who are your clients?

- ▶ We cater three categories of clients: manufacturers and market participants, academicians, and investment banks and venture capitalists
- ▶ We service more than 1,500 clients annually. More than half of our clients re-engage us for additional reports and services.

How will I receive this report?

- ▶ The report will be delivered to you via PDF, Excel, PPT downloads & BI dashboards
- ▶ Post purchase you will receive an email with a link to access the report on our proprietary platform - Compass
